Hello Suketu

The training sessions conducted by you were awesome.

I found the sessions to be really fruitful due to some great mix of theoretical and practical aspects supplemented by tutorials.

I had many questions before getting into the training but in the end found that your knowledge/expertise has helped gain insights into Azure and it's functioning in great details along with satisfactory clarification around doubts/questions I had.

You have been really professional in conducting these sessions, especially when your flight was delayed for the first day, kind of energy and commitment showed by you is exemplary.

This note is just to thank-you for all the efforts you have put in to make the training sessions a success.

I am sure there would be opportunities in future where we may get together again .. !

Regards

Yogesh Gaikwad
